BEYOND EARTH SYMPOSIUM 2024

The pace of space innovation that will enable space migration is outpacing public policy and international law regimes. At the **2024 Beyond Earth Symposium**, we will address urgent current issues and explore new, cutting-edge topics that must be brought into the international space policy debate.

Join us, and let's be bold together! The third annual Beyond Earth Symposium will bring together stakeholders from industry, government, and the international sector. We are building momentum to transform the policy and legal landscape to enable a future of space migration. Be a part of this work and dare to dream big.

SYMPOSIUM AUDIENCE

The audience will include 200 stakeholders from the government (US and international; agencies and lawmakers), the space industry (legacy companies, new disrupters, and entrepreneurs), and academia (space policy and law). Both top-level officials and executives, as well as policy professionals from respective organizations, will attend.

- Government (U.S. and international; agencies and lawmakers)
- Space industry (legacy companies, new disrupters, and entrepreneurs)
- Academia (space policy and law)
- Top-level officials and executives, as well as policy professionals
- Press, including mainstream as well as trade press

SYMPOSIUM VENUE

The Beyond Earth Symposium will be held in the Claudio Grossman Hall at the American University Washington College of Law, conveniently located at 4300 Nebraska Ave, NW Washington, DC, with easy access to parking.

SYMPOSIUM AGENDA Topics

(Subject to change)

- 🌐 The LEO Commercial Space Station Ecosystem
- 🌐 Making Cislunar Infrastructure an International Priority
- 🌐 Insurance and Managing Risk in Space
- 🌐 Government-Enabled Financing Models
- 🌐 Identifying the Space Market Opportunities
- 🌐 Gaps in Space Human Factors Research
- 🌐 Large-Scale Space Habitats in the Near Term
- 🌐 The Future of Human Spaceflight Regulations
- 🌐 Competition and Cooperation in The Global Space Economy
- 🌐 Space Commerce in a New Administration & Congress
- 🌐 Space Environment – Orbital Debris & Space Situational Awareness
